

MacDickson Dziedorm

Front-End Developer

Email : haeldicl@gmail.com

portfolio : <https://my-portfolio-dickwson-sys.vercel.app>

Github:<https://github.com/Dickwson-sys>

PROFESSIONAL PROFILE

Front-End Developer with hands-on experience building and shipping cross-platform web and mobile applications using React.js and React Native. Skilled at binding complex data structures to UI components, translating client feedback into functional product updates, and leveraging AI tools to accelerate design and development workflows. Adept at performing live application demos and collaborating directly with stakeholders to deliver polished, business-ready interfaces. Currently pursuing a B.Sc. in Software Engineering at Ghana Communication Technology University.

PROFESSIONAL EXPERIENCE

Front-End Developer Intern

National Insurance commission , Accra

March 2025 – May 2025

- Designed and implemented visual interfaces for cross-platform business applications using React Native and JavaScript, directly improving usability across departments.
- Bound complex data structures from RESTful APIs and Firebase Firestore to front-end components, ensuring accurate, real-time UI rendering.
- Utilized AI-assisted tools to accelerate design iterations and streamline development workflows, reducing turnaround time on feature updates.
- Presented working application demos to internal stakeholders, gathered direct feedback, and translated those insights into targeted functional updates within tight delivery cycles.
- Collaborated closely with engineers and business owners to resolve UI/UX issues, debug application behaviour, and maintain high code quality using Chrome DevTools.
- Assisted with infrastructure upgrades and system monitoring, demonstrating a broad understanding of the technical environment behind business applications.

EDUCATION

B.S.C Software Engineering

January 2023 - September 2026

Ghana Communication Technology University, Accra

CORE COMPETENCIES

UI/UX Design & Visual Interface Management • React.js / Next.js / React Native • Cloud AI Engineering & LLM Integration • Data Binding & Component Architecture • Client Demo & Feedback Gathering • AI-Accelerated Development • Agile Collaboration • Strong Professional Communication

TECHNICAL SKILLS

Frontend Development

Frameworks: JavaScript (ES6+), React.js, Next.js, React Native, HTML5, CSS3, Tailwind CSS

UI & State Management: Hooks, Context API, Responsive Design, Mobile UI/UX Design, App Performance Optimization

Debugging & QA: Chrome DevTools, Software Quality AssuranceCloud AI Engineering

AI Integration: LLM API integration, AI-powered application development, prompt engineering

Cloud Platforms: Firebase Cloud Functions, cloud deployment & scaling, serverless architecture

AI-Accelerated Dev: AI tools for design generation, code acceleration, and workflow automation

Databases & Auth: Firebase (Firestore, Auth, Analytics, Cloud Functions), Appwrite

APIs: RESTful API Integration, JSON data binding

Languages: Java (OOP, Data Structures)

Tools & Workflow

Version Control & Package Mgmt: Git / GitHub, NPM, Yarn

AI Tools: Experienced with AI-assisted development tools for design and workflow acceleration

IT & Infrastructure: VMware, Linux CLI, Network Configuration, Security Hardening, System Monitoring
